About Reports

Distributing, controlling, and accounting for test booklets can be a complicated process. iTrackSTAAR simplifies this process by enabling you to view the location and status of every test booklet without ever leaving your desk. Using the Report Wizard, you can view a variety of online reports that will help you maintain strict accountability of all test booklets.

Monitor Location & Status of Test Booklets

Inventory Reports

Inventory reports show the status of all test booklets at a particular location such as a campus. Campus administrators can use Inventory Reports to view assigned booklets & compare scanned items with Master lists.

Central office personnel can view the status of test booklets that are located at the central office as well as the distribution and status of test booklets at individual campuses.

Missing and Extra Items reports identify items that are assigned but not in inventory as well as items that are extra.

Master List Reports

Ideally, test booklet security number lists would always have the correct number of test booklets allocated for each campus. Because of student mobility, this not always the case.

iTrackSTAAR facilitates the process of re-assigning test booklets and managing large numbers of test booklet security number lists.

Using Master List reports, Central Office administrators can keep track of booklet assignments & ensure that the correct number of booklets are allocated for each campus.
